

Compiled with problems:

ERROR in ./node_modules/body-parser/lib/read.js 19:11-26

Module not found: Error: Can't resolve 'zlib' in
'/home/shangita/Desktop/UMASS_Global/Assessment/40.8-react-forms/todo/node_modules/body-parser/lib'

BREAKING CHANGE: webpack < 5 used to include polyfills for node.js core modules by default.
This is no longer the case. Verify if you need this module and configure a polyfill for it.

If you want to include a polyfill, you need to:

- add a fallback 'resolve.fallback: { "zlib": require.resolve("browserify-zlib") }'
- install 'browserify-zlib'

If you don't want to include a polyfill, you can use an empty module like this:

```
resolve.fallback: { "zlib": false }
```

ERROR in ./node_modules/body-parser/lib/types/urlencoded.js 201:12-34

Module not found: Error: Can't resolve 'querystring' in
'/home/shangita/Desktop/UMASS_Global/Assessment/40.8-react-forms/todo/node_modules/body-parser/lib/types'

BREAKING CHANGE: webpack < 5 used to include polyfills for node.js core modules by default.
This is no longer the case. Verify if you need this module and configure a polyfill for it.

If you want to include a polyfill, you need to:

- add a fallback 'resolve.fallback: { "querystring": require.resolve("querystring-es3") }'
- install 'querystring-es3'

If you don't want to include a polyfill, you can use an empty
